**RE: POLITICAL AND OVERSIGHT BRIBERY ENABLED HEALTHCARE RACKETEERING CRIMES**

Dear FEC investigators:

Please consider this letter as my FEC complaint that WI political donations aided racketeering crimes:

1. **Realtor Mr. Ray C. Leffler stated his WI Governor Scott Walker donations secured lax oversight** for his business partner, cocaine dealer Dr. Steven Armus of Great Lakes Dermatology (GLD). WI Walker's oversight (DSPS, Department of Safety and Professional Services) ignored complaints of Dr. Armus' patient harm and deleted criminal evidence (my Rx data) from the DSPS database; Dr. Armus used my medical identity for illegal drug distribution and then framed me for fraud.

2. It was **DSPS Chair Dr. Sheldon Wasserman, Milwaukee elected official** and Ascension physician, and former **Chair of DSPS and FSMB Dr. Kenneth Simons of Medical College of Wisconsin** who had authority over DSPS integrity of Rx data. In addition to deleting criminal evidence, they also hastily suspended my medical license, denied me of due process rights, blocked investigation of Rx forgeries, and made public criminally falsified claims to discredit my concerns as a paranoid delusion. Elected politicians and oversight leaders have harmed patients and the public safety.

3. **State Attorney Josh Kaul** refused to investigate DSPS involvement in Dr. Armus' racketeering and DSPS failing to protect patients from sham skin cancer surgeries, an area of interest for US DOJ.

4. I do not know if current and former **Governors Tony Evers and James Doyle** were involved in any of the nefarious DSPS activities and political bribery therein. I am unaware of Mr. Leffler's giving political donations to any Democratic causes.

Intentional patient harm killed my patients while DSPS dismissed all complaints, blocked investigations, deleted my Rx data (proof Dr. Armus stole my medical identity), and discredited me by making public a criminally falsified claim that my concerns were part of a paranoid delusion (per DSPS in my medical license suspension). License suspension gave criminals the ability to thwart oversight investigation.

I am frightened for patients and public safety because medical malfeasance was aided/abetted by corrupt oversight and politicians and DSPS itself. Some affidavits and evidence is a ResearchGate healthcare reform project; healthcare is not safe when criminals control politicians and oversight.

Sincerely,

Nanette J. Liégeois M.D., Ph.D.
