PUBLIC & PATIENT SAFETY ANNOUNCEMENT

Report crime

Dr. Jeff Hall
St. Croix Health™

Dr. Hall & co-conspirators aided illegal Rx drugs by:

- Discrediting an ID theft victim physician & witness
- Weaponizing falsified medico-legal "evidence"
- Sabotaging the doctor's patient care & hospital clinics

Help Institute Medicus™ protect patient and public safety:
visit https://ciehealthcarereform.org/
to report Dr. Hall, the hospital, and oversight co-conspirators.

St Croix Health[1] medical malfeasance & crime: are you my patient?

To my Saint Croix Falls patients: your clinical care was intentionally compromised.

Patient safety concerns cause me to ask everyone to report tips and suspicious activity. After felon Dr. Steven Armus stole my medical identity for illegal Rx drugs, St. Croix Health co-conspirators used strategic medical malfeasance to aid his healthcare racketeering:

- Clinical sabotage: St. Croix Health co-conspirators obstructed clinics and my care of patients so Dr. Hall could falsely claim I didn't properly care for patients. At least 2 former patients died (2014, 2022) from this sustained clinical sabotage campaign.
- Falsified medico-legal "evidence": a "patient safety report" falsely blamed me after nurses remotely compromised patient care (they altered electronic record settings).
- Strategic libel: Dr. Hall's perjury called my medical identity theft concern a paranoid delusion. Co-conspirators used his libel to obstruct investigations for over 10 years.
- Dr. Hall did fake cancer surgeries and lied to patients, "you're all set." HR protected hospital donor Dr. Hall's fraud instead of patient safety: nonclinical LeeAnn Vitalis implausibly used nonsensible unlicensed staff emails to interpret my patient care.
- WI healthcare oversight (DSPS) deleted my Rx data (medical ID theft evidence): this explains DSPS refusing to investigate Dr. Hall's false claims and my counter claims.

For my former St Croix Falls patients, I offer free review of your 2014 dermatology care:

1. Ask St. Croix Regional Medical Center (St Croix Health) to determine if I saw you as a patient in 2014. If yes, ask the hospital for a copy of your 2014 medical records.
2. Go to https://ciehealthcarereform.org/: under "Help for patients," download, print, and sign a release for me to review your information. Send the signed release and your 2014 dermatology medical record to me: P.O. Box 374, Lindstrom, MN 55045.
3. I will contact you. If you do not hear from me, please feel free to call me to confirm I have in fact received your 2014 dermatology medical records at (443) 547-3679.

For patients and citizens who share my concerns: Gov. Evers, DSPS, WI U.S. Senators Tammy Baldwin and Ron Johnson failed to adequately respond to these concerns. You can share concerns with them, but please report tips to federal agencies (FBI and Health and Human Services Office of Inspector General) since oversight (DSPS) aided racketeering. Institute Medicus™ https://ciehealthcarereform.org/ has links to agencies. Patients must have proper (ethical) medical care to address the intentionally compromised patient care.

I do offer warm regards and sympathy to my surviving former patients and their families,
Nanette J. Liégeois M.D., Ph.D. (a.k.a. No No Nanette®)

---

[1] Saint Croix Regional Medical Center changed their name to St Croix Health™ after I exposed their medical malfeasance.
